Have you ever been away on holiday and thought the hotel sheets were to die for? If you're like most people, you probably thought about getting a similar quality use at home. The only problem is that buying hotel-grade linen can be prohibitively expensive. You're not alone. Rich Fulop, the founder of Brooklinen, got the idea for his company after staying in Las Vegas. He decided that everyone should have access to quality bedding set at a price they could afford and so Brooklinen emerged. What makes it different is that it operates mainly online and acts as its own wholesaler. The price savings are passed on to the customer, and Brooklinen has received rave reviews. But do they really deserve them? Do the Brooklinen sheets feel as good as people say they are? Let's take a little look at this. You get a flat and a fitted sheet set along with two pillowcases. The textile is made of high-quality Belgian Flax and is made in Portugal. Comes in White or Cream. Is stonewashed so it feels lived in from day one. Oeko-Tex certified. Fits mattresses that have a depth of no more than 12 inches. You get king-size pillowcases with the Cal King and King packs. 60 day money back guarantee. Pros: Excellent quality. Wicks away water better than cotton. Good for hot sleepers. Feel soft and soften more when washing. Sustainable. No harmful chemicals used in the production process. Cons: Your color options are limited to White or Cream. Linen wrinkles a lot. If you return the goods, you are still liable for shipping and handling. If you've used them before returning them, there's a processing fee of \$9.95 Material/Style The Linen Core blades are the latest addition to the range. They are made with the same attention to detail. They are made of Belgian Flax and woven in Portugal. The textile is washed stone before it leaves, which makes the linen immediately softer. The Brooklinen pillowcases set are made of the same fabric and feature the company's standard envelope design. This means no zippers that get stuck and no pillows making a break for not. A percal weave has been used to ensure a mix of usability, feel, & breathability. The colors are preserved to a simple white and cream, so you have a very understated style with this product. Build quality The build quality is excellent. The stitching is very neat, and it is definitely trying to live up to its promise of producing quality products at excellent prices. The stitching will not be undone in a hurry and, with proper care, these fitted sheets will last for a good long time. The fabric feels tight and and this bodes well for longevity. The percal tissue creates a solid fabric that does not fall apart after a few washes. The finish is understated and elegant. As Brooklinen puts it, it makes style effortless. Durability All natural fibres are subject to some shrinkage, especially in the first few washes. What makes this different is the fact that they are already stone washed. This means that shrinkage, if any, is kept to a minimum. If you follow the correct care instructions, you should not have a huge problem with shrinkage at all. Linen is also a very durable fiber and is good to wash and wear. A good set of linen sheets, if well taken care of, will last you a lifetime. Taking care of your bedding is not a complicated process, it just means you need to spot the handling of spillage immediately, use a cold wash when washing and, preferably, hang it out on the line. You could use a dryer if you need it, but should use the lowest possible setting. Weight Depending on the type of bedding you are used to, these will definitely feel a little heavier. It's a higher quality textile, and the fabric used makes it a little thicker as well. It won't crush you, but it will certainly feel heavier than a standard cotton or poly cotton one would. What makes this okay is that it breathes very well and doesn't cling to your body, so you're not going to get hemmed in or caught at any stage. Moreover, if you decide that this linen is not suitable for you, you can simply return it. All you will be out of is shipping and admin fees. Feel and Comfort People are amazed at how soft these decorated plates are. When thinking about linen, you tend to think about sharp fabric that doesn't move well. The stone washing part of the production process helps to give the sheets a softer, more used feel. They are comfortable from the day you receive them and will soften more every time you wash them. When it comes to regulating body temperature, nothing beats natural fibers. Linen was used to make clothes in ancient Egypt for an excellent reason - it allows the skin to breathe. This set of sheets do the same thing. As a bonus, the linen has better moisture-wicking properties and better absorption than cotton. Price/ Value We don't look at the cheapest perfect excuse to sleep naked, btw). But where to start? Fortunately, as easy as it is for you to find linen sheets online, it's just as easy to find honest reviews of these linen sheets so you know you're making the right choice. These are the best. Ad - Continue reading 1 Simple&Opulence Linen Sheet Set Below With over 200 five-star reviews, these ridiculously affordable 100 percent linen sheets from Simple&Opulence will surely give you sweet, sweet dreams. Need more evidence? I dream about these sheets, wrote one reviewer. They feel rich and expensive and I feel like a million dollars when I sleep in them. I am so incredibly happy with my purchase and they have become my go-to gift for people who are going to live in a new home. 2 Brooklinen Linen Core Sheet Set Brooklinen brooklinen.com \$249.00 With linen in its name, this company isn't messing around on plate quality. Not only do they have more than 300 five-star reviews, but Brooklinen's magazines have won their fair share of awards, too. Take it from this person: These sheets are wonderful at regulating the temperature and are definitely the most comfortable sheets I have ever bought. As I read in another review, they seem to get softer with each wash. I feel like I'm going to order a

new set soon. 3 Len Linum Linen Sheet Set Len Linum amazon.com \$199.99 Finding high-quality linen sheets can be like walking through a (really soft) minefield. Fortunately, this European set from Len Linum comes thoroughly vetted with over 130 five-star reviews on Amazon. They convinced this person: I've wanted linen sheets for centuries, but the cost has always put me off. Then I came across these sheets for an excellent price and overall good reviews... I didn't get hot or sweaty like I usually do, and my body didn't 'grab' on the sheets like they do with cotton. 4 Parachute Linen Sheet Set parachutehome.com \$139.00 If you're buying linen sheets for the first time, it can be low-key terrifying to drop over \$100 on something you might not like. Parachute understands your commitaphobia, so they offer a 90-day trial. If you don't absolutley love your sheets, you ask them back- without asking questions. But if you want something like this person, you certainly won't want to: Cleary, these are the most comfortable sheets we've ever had. We washed the sheets for use, and yes, they were a bit scratchy at first, but we gave them a chance. After another wash we are hooked! They are soft, warm, soothing and a very comfortable weight. I think we sleep better at night because of these great sheets. 5 DAPU Linen sheet set These linen plates are made exclusively from high quality French grown flax, grown naturally and processed without chemicals or additives. The flax was also harvested on a way, so you feel good about buying them-and not just because of all their five-star reviews. These sheets are the real deal. Good quality linen... The The sheet is generous and so are the pillowcases. I'm sold on linen, wrote one reviewer. This is my first set and honestly was a bit reluctant... I can't believe I'm writing a long review on linen sheets, but there you have it. 6 Merryfeel Linen sheet set amazon.com If you want to feel cheerful and bright every morning, try these five-star French linen sheets from Merryfeel. As one reviewer says: I chose these sheets mostly based on the price, but also because they come in a bunch of colors, and I thought if I really liked the white ones, then I could get them in a different shade, too. I'm in love with these sheets! They are the same quality and durability of the more expensive, and they feel very luxurious. One small downside is that they had a rather yucky smell when I first took them out of the pack (almost sulphur-like); but the smell was gone after washing. 7 Cultiver Linen sheet set When you buy linen sheets, you usually need to wash them before you put them on your bed. Not these - they come prewashed for softness and durability so you can enjoy them as soon as possible. And while these linen sheets are a bit more expensive than others, reviewers say they are absolutely worth the investment. Since I set a new king size bed, I've decided to splurge on a set of sheets, and I'm totally happy, wrote one. The king size linen is quite expensive (at least for me), and I'm used to spending under \$200 for quality pima cotton sheets... I was pleasantly surprised at how thick and well made the sheets are, and after a wash, how soft. 8 Rough Linen Smooth Linen Sheet Set Although the name of the brand may seem a little rough around the edges, their sheets are surprisingly smooth (by the standards of linen) and made for sweet dreams. Just a little FYI: This set comes with two flat sheets (instead of one mounted and one flat) that are big enough to tuck under your mattress with traditional hospital corners. If you like that, you'll have a few life-changing sheets, according to 170 five-star reviews. These sheets are great. I bought them as a Christmas present for my partner and he hasn't stopped raving about them; I'm glad I enjoy it too! said a reviewer. 9 Linoto Linen Sheet Set If you need specific linen plate (or want), look no further than Linoto. The company offers the widest range of sizes and colors of luxury linens of real linen online, so you can always find your perfect fit. And with over 300 five-star reviews, Linoto is known not only for its unparalleled volume of sheets, but also for its overall quality. These linen sheets are the best ever! They are soft but have dust, and sleeping on them is like being encased in a soft warm cloud, said one person. They wash well, can be dried in the dryer, do not need to iron, and are about generally perfect. Expensive but worth it! 10 Coyuchi Organic Linen Sheet Set Not only are these linen plates made of organic French flax, but the chambray fabric means Coyuchi uses low-impact low-impact for colour that is perfect for sensitive skin (score). With these sheets, you get what you pay for, so while these are definitely more expensive, you get a lot of benefits for your buck. These linen sheets and duvets are so amazing! This is my second set of bedding from Coyuchi! My husband loves them because they keep him cool and I like them because they keep me warm - linen can regulate body temperature or not, wrote one reviewer. They're not soft sheets, so some people may have to spend time getting used to the feeling, but they soften with regular washing. Really worth the \$\$\$!
